SMART CONNECT DOOR

Security starts at the door.
The smart video door intercom system.

www.fuhr.de

The smart video door intercom system. Never miss a visitor – no matter where you are.

SmartConnect door is the modern, smart video door intercom system that opens up new possibilities for you. Via tablet or smartphone, you can connect with your visitors any-time, anywhere, even when you are away from home.

Furthermore, a SmartHome server is integrated in the small and discreet door module, with which not only the door opening but also user and access authorizations can be managed or, for example, the switching of the lighting is possible. Without complex cabling and expensive analysis and control units, **SmartConnect door** offers the end user and the door manufacturer numerous benefits that are unique in this combination.

Benefits for end user:

Smart door intercom system

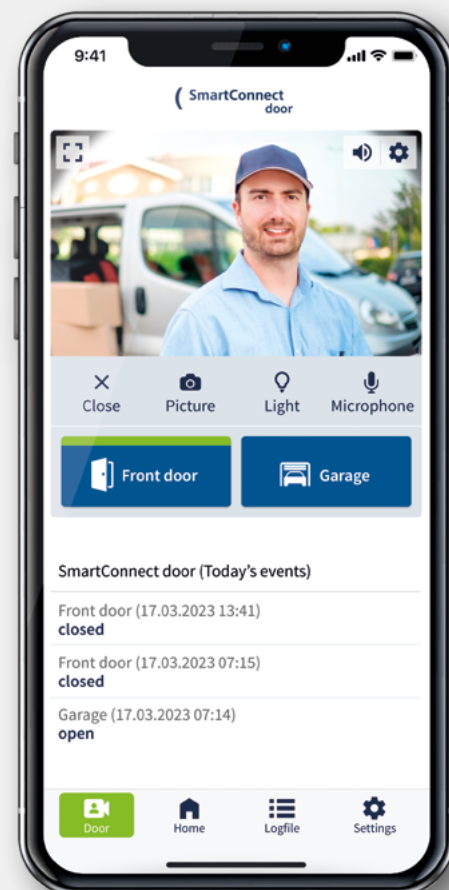

- ✓ Intuitive handling of the door intercom system via app.
- ✓ Smart alternative for products which are expensive and difficult to install.
- ✓ Location-independent interaction with visitors: A ring at the front door is sent via push notification to authorised mobile devices.
- ✓ Versatile functions: e.g. see visitors, talk to them, open the door, create photo protocol.
- ✓ Additional security: This creates the impression to the person at the door that you are at home, and the user sees who is at the door.
- ✓ Integrated touch doorbell and additional connection option for on-site door bells or light switches.

SmartHome functions

- ✓ It can control not only doors fitted with **SmartConnect door**, but also other doors with motorised locks or electric strikes, as well as garage doors, lights, etc.
- ✓ High security of the system due to secure encryption and user accounts.

Smart access

- ✓ **SmartConnect door** also allows convenient access to the building from outside.
- ✓ With the smartphone via internet or with radio key or by fingerprint scanner*.
- ✓ Allows individual user management with time profiles.
- ✓ Door mode monitoring.
- ✓ Logging of all events.

* **SmartConnect door** with fingerprint scanner expected to be available in Q3 2024.

Benefits for fabricators:

Smart added value

- ✓ Added value: The door element is supplemented by an additional, intelligent component, making it unnecessary to consider other assembly systems.
- ✓ Access control already integrated, door opening e.g. via smartphone, radio key or fingerprint scanner*.

Smart extensions

- ✓ Up to three additional doorbells can be connected.
- ✓ Numerous connection options offer real added value: e.g. in addition, garage doors, shutters, lights and much more can be controlled via **SmartConnect door**.

Smart installation

- ✓ Equipment and testing of the whole door element and the video door intercom system in the door construction is possible.
- ✓ Simple assembly in the door element – no inspection openings.
- ✓ Only 12 or 24 V power and a LAN connection needed. Door is opened via radio signal, in conjunction with the FUHR smart radio module.
- ✓ Combination with FUHR motorised locks offers particularly simple installation and commissioning, as well as a wide range of functions.
- ✓ **SmartConnect door** is also compatible with all commercially available motorised locks and electric strikes.

SmartConnect door.

Flexible in placement, easy to install.

- ✓ The compact design allows different types of installation in all door materials.
- ✓ An installation is possible both in the sash profile and the door panel. Depth and width of the module correspond to the installation dimensions of, for example, the FUHR fingerprint scanner.
- ✓ The simple design does not affect the door's appearance.
- ✓ Option for flush mounting beside the door for retrofitting.
